

Building a Relationship Conversation

A Podcast-Led Journey from Conversation to Connection

SITUATION

Indonesia Has Massive Attention on Short-Form Video

INTERNET USERS

212.9M

77% nationwide penetration, creating a massive addressable digital audience.

DAILY ENGAGEMENT

3+ Hours

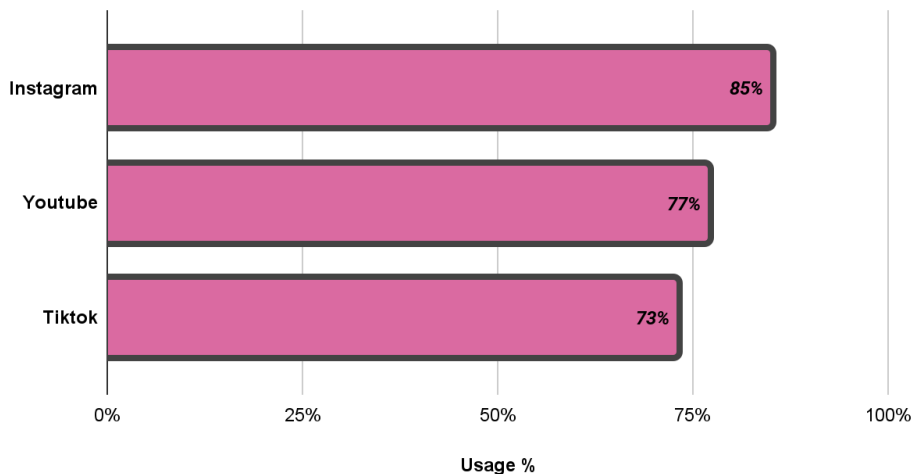

Average time spent on social media per day by Indonesian users.

While video platforms (Instagram, TikTok, YouTube) are already saturated with reach (>70%), structured long-form conversations are still under-served on these platforms, creating room for “podcast-style” relationship content in short-form video.
