

User Engagement and Premium

Project Background

Problem Statement

- Company struggles to identify and understand behavioral differences between Free and Premium users, impacting conversion strategies.
- The company lacks insights to determine which games should be prioritized to improve user conversions.

Objectives

1. Understand **user engagement and behavior** differences between **Free & Premium users**
2. Analyze **the top engaging games** and their impact on user conversions.

Behavioral Analysis for Free and Premium Users

Distribution of Free vs Premium Users

- Free users **dominate key features**, showing **high engagement** but low conversion to Premium.
- Potential for conversion if Premium benefits are aligned with Free users' behavior.
- Premium users are more likely to engage in **social sharing**

Game Session Duration & Submission

1. Premium users stream **1 hour longer on average** compared to Free users
2. Premium users are more **consistently engaged for longer durations**
3. The **high duration among Free users** suggests a potential group of highly engaged users who could be converted to Premium.
4. The **Premium user's activity is 4x higher** than the Free users
5. Premium users are significantly **more engaged in both** the frequency of game sessions and

Generated, Downloaded, and Shared Clips per User

- The total number of generated and downloaded clips is higher for Free users (likely due to their larger user base)
- This indicates that Free users, as a group, are less engaged on an individual level.
- Premium users share more clips overall, making sharing a potential key driver for conversion.

Recommendations

1. Target High-Activity Free Users

- Offer 7-day Premium trials to free users who reach their limit with high activity, i.e 3-lifetime upload and 3-hour stream limits.
- Incentivize creators near the 15-clip limit with a Premium trial to unlock 15-30 clips more.

2. Social Proof Campaigns

- **Encourage** Premium users to **share premium's watermark-free clips and tag your brand on social media.**

3. Upsell During Peak Activity

- Offer premium trials and emphasize benefits promo on peak periods such as Oct-23

4. Growth Strategy Optimization:

- Conduct a **root-cause analysis to investigate the decline**, including user feedback, competitor activity, or external conditions
- Identify and replicate successful strategies implemented before October with necessary adjustments for

Determining Which Games to Focus On

Number of Sessions Per Game

Top 6 Games: Number of Sessions per Game by User Status (Free vs Premium)

1. **COD: Warzone3.2 & MW3.2** - High engagement makes it a **strong focus** for enhancing features to boost Premium conversions.
2. **"Other Games"** - Highest sessions; identifying key drivers and need deepen analysis in this category can unlock new opportunities.
3. Free users drive the majority of activity, indicating they are the backbone of the platform's activity.

Generated Clips Per Game

1. "COD: Warzone3-2 & MW3-2", "Fortnite", and "Other Games" also dominates the generated clip.
2. Premium users are more engaged in top-performing games but less active in generated clips for Fortnite, Valorant, and Apex Legends, suggesting potential for targeted campaigns.
3. The "Other Games" category remain appears, indicates a variety of content that also attracts users.

Number of Clips Downloaded Per Game

1. The games with the most downloaded clips are "COD: Warzone3-2 & MW3-2", "Fortnite", and "Other Games".
2. Free user remained the biggest proportion in downloaded clips
3. Niche content "Podcast" become top 5, have smaller contributions but may target niche segments to listen commute.

Number of Shared Clips Per Game

Top 6 Games: Number of Shared Clips per Game by User Status (Free vs Premium)

1. The games with the most shared clips are "COD: Warzone3-2 & MW3-2", "Fortnite", and "Other Games".
2. Premium users seems to have bigger proportion on shared clips for top 6 games
3. Free user had chance to near dominant in Valorant in terms of shared clips, while the others are premium.

Recommendations

1. Focus on Popular Games (COD: Warzone, Fortnite, Valorant)

- Promote Premium features like AI Editing, Trim & Montage Maker, and vertical format conversion for social media (7 days trials).
- Provide discounts premium based on free users' activity on the 3 top games

2. Personalize Promotions based on Popular Games Activity

- Send tailored offers based on user activity data engagement.
- Target Free Users with engaging push notifications to showcase Premium benefits.

3. Promote Sharing Behavior Among Free Users:

- Offer in-app rewards or gamification features (e.g., badges, leaderboard recognition) for Free users who frequently share clips, encouraging them to mirror Premium users' behavior.

4. Expand Niche Appeal:

- Collaborate with influencers or industry experts to create podcasts that appeal to specific user interests (e.g., gaming tips, tech trends), driving downloads from targeted audience segments.
